Finnish Authenticator – Foreign Citizen Identification Service

The foreign citizen identification service, or the Finnish Authenticator Identification Service, allows foreigners to use Finnish public administration e-services that have introduced identification using the Finnish Authenticator app.

Identification using the Finnish Authenticator Identification Service is intended for foreign citizens who do not have a Finnish personal identity code or means of identification. The Identification Service can be used both as an individual customer and on behalf of companies and organisations.

The Finnish Authenticator is an application that can be installed on a mobile phone and used as an identification token when logging in to e-services.

The use of the Finnish Authenticator service in e-services requires using the Suomi.fi e-Identification and access rights.

1 Products

Product / Service	Charge type	Price
Finnish Authenticator	user/year	EUR 7.50

The service is free of value-added tax.

The annual price the partner organisation pays for the service is determined by the number of users.

A service user is defined as someone who activates the Finnish Authenticator authentication method in order to use a certain e-service.

Organisations using the identification method are obliged to monitor the number of users. The number of users is reported to the Digital and Population Data Services Agency before invoicing. The service is invoiced retrospectively on an annual basis.

Identification transactions are not charged separately.

The organisation using the Finnish Authenticator service is responsible for the costs of setting up the service, i.e., the deployment of Suomi.fi e-Identification and the maintenance of its integration in the organisation's e-services. No separate deployment fees are charged for the deployment of Finnish Authenticator.

2 Performances priced on commercial grounds

The general criteria pertaining to the charges of performances by State authorities are laid down in the Act on Criteria for Charges Payable to the State (150/1992).

Performances priced on commercial grounds of the Digital and Population Data Services Agency are determined in accordance with the current Decree of the Ministry of Finance on the fees charged for the Digital and Population Data Services Agency's performances.

The aforementioned decree contains provisions on the pricing of the Finnish Authenticator service, i.e., the foreign citizen identification service. The service will be priced according to the valid price list.

3 Validity

This price list has been valid since 1 January 2022, and it will remain in effect until further notice.
