

Business-based price list for the Population Information System query interface

Population Information System query interface

The Population Information System query interface is a service that allows a customer organisation to retrieve individual data from the Population Information System in real time, directly into its own information system. The data may only be used in accordance with the data permit granted to the organisation.

The query products of the Population Information System query interface are divided into different price categories based on the scope of the data disclosed to the customer from the Population Information System.

Any costs related to establishing, modifying or extending the connection to the Population Information System query interface are charged separately on a case-by-case basis.

In addition to the query products listed in this price list, the Digital and Population Data Services Agency may also develop other customised query products and determine their prices.

The prices of the products include a query connection between the electronic service identifier and the personal identity code, if the customer chooses to include the SATU-HETU query as part of the product.

Validity of the price list

This price list enters into force on 1 January 2025 and remains valid until further notice.

Price list for the Population Information System query interface

Monthly fees

- The minimum monthly charge for the service is EUR 9 per invoice.

Use of the training environment is free of charge for customers.
