

Population Information System query interface – Deployment process for intermediary companies

1 Explore the service

The **Population Information System query interface** is a technical solution that is integrated into your organisation's own information system. Familiarise yourself with the website of the Population Information System query interface and, if necessary, contact the service by email.

2 Identify the requirements for using Population Information System data

The data in the Population Information System is not public, and the data may not be disclosed to third parties. The data disclosed to an organisation and the purposes for which it may be used are always agreed on a case-by-case basis. Acting as an intermediary company and transmitting Population Information System data to the company's end customer organisations requires a data permit (framework permit) for the Population Information System query interface, granted by the Digital and Population Data Services Agency.

3 Create an e-services account or join an existing one

To apply for a data permit, your organisation needs an e-services account for the Digital and Population Data Services Agency's e-services. If your organisation already has an account, ask the account administrator to invite you to join it. You can log in to the e-services using online banking credentials, a certificate card, a mobile certificate or an identity card.

4 Apply for a data permit in the e-services

Apply for a framework permit using the application for data access for the Population Information System query interface in the Digital and Population Data Services Agency's e-services. In the application, specify the Population Information System data required by your end customer organisations, describe the purpose of use of the data, and answer questions concerning the processing and protection of the data.

5 Take into use a certificate or the Suomi.fi Data Exchange Layer

To establish the connection, your organisation must use either the Suomi.fi Data Exchange Layer provided by the Digital and Population Data Services Agency or a certificate.

6 Accept the terms of the data permit

Once your data permit application has been processed, you will receive an email notification of the decision. In the e-services, review the data permit and its terms, and then accept the terms of the permit.
