

Changing over from the KATSO  
service to Suomi.fi services

The use of the Katso service will be phased out by the end of 2020

# Starting points

- **The mandates must be created in Suomi.fi e-Authorizations** – the current authorisations in Katso will NOT be transferred to the new service.
- **Separate identifiers will not be required** for using the Suomi.fi services and the authorities' e-services – users will always perform strong identification using their personal tokens.
  - internet banking codes,
  - mobile certificate
  - ID card issued by the police
  - smart card issued by the Digital and Population Data Services Agency, such as an organisation card or an ID for social welfare and healthcare professionals

# How do different organisations create the mandates in Suomi.fi e-Authorizations?

All companies  
Oy, Ky, Ay,  
private entrepreneurs,  
cooperatives, etc.

Associations  
(right to represent alone)

Associations  
(Two together or a similar  
authority to sign)

Municipalities, joint  
municipal authorities,  
government agencies,  
parishes, foundations, VAT  
partnerships

Foreign companies

# Mandate types

A company or organisation can grant the following types of mandates

(a person can grant only mandates for transactions)

- **Mandate for transactions:** A person, company or organisation with a mandate for transactions may act on behalf of the company or organisation that has granted the mandate.
- **Right to grant a mandate:** A person given the right to grant a mandate can grant mandates for transactions on behalf of a company or organisation to other persons, to companies or organisations.
- **Mandate to represent:** A person with a mandate to represent may act on behalf of a person or another company or an organisation that has granted a mandate to the company the person represents.
- **Representative's right to grant a mandate:** A person given a representative's right to grant a mandate can grant a company or organisation a mandate to represent the person, company or organisation and request mandates for transactions from other companies, organisation and persons to manage the assignor's affairs.

These mandate types are used when a person or a company/organisation is authorised to **act in matters related to their own organisation** in different e-services.

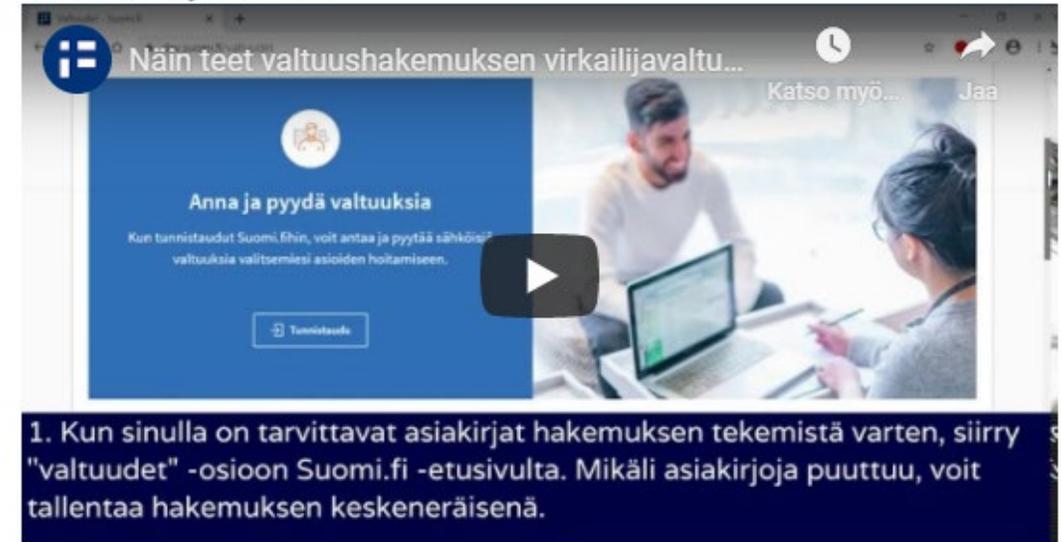

These mandate types are use when a company/organisation **receives a mandate from another company/organisation to act on their behalf** in matters related to their organisation in different e-services.
